

## Teltonika ModemUSB/E6

Has it ever occurred that you were not able to have access to the Internet while you were on a business trip with your notebook computer? Wouldn't it be nice if you can log on to the Internet to acquire essential information while you were in front of an important customer? Now all your problems are solved by the Teltonika ModemUSB/E6 GPRS/EDGE modem! With the **help** of this device, you are able to log on to the Internet anywhere and everywhere with your notebook computer. You won't need to buy an expensive and hard-to-use wireless PDA anymore!

Real-time business transaction, sending and receiving emails, browsing WEB database, accessing VPN and sending SMS messages from your PC etc - all in your hand! With the help of Teltonika ModemUSB/E6, you can maintain your top mobility, easy access to the Internet no matter where you are on a train, bus, or in a car.

Teltonika ModemUSB/E6 has a built-in USB interface, just simply plug the cable into any notebook or desktop computer and you will be able to get connected with the Internet via GSM network. Unlike PCMCIA modems, Teltonika ModemUSB/E6 could be connected not only to notebook, but to any PC having USB support.

**There** are several different frequency bands for GSM network worldwide: 900/1800 MHz for Europe through out Asia and 850/1900 MHz for North America. That is why there are two versions of Teltonika ModemUSB/E6: one is designed for Europe and Asia and the other for Americas.

Teltonika ModemUSB/E6 connects to the PC through USB 2.0 (Universal Serial Bus) interface, which is very speedy and convenient. The modem takes the DC power directly from the USB interface, so there won't be any charging device or external AC/DC adapter required. You will achieve much higher speeds with Teltonika ModemUSB/E6 than with ordinary dial-up modem (56 kbps), as Teltonika ModemUSB/E6 supports EDGE class 6 (up to 177,6 kbps) and GPRS class 10 (up to 56-114 kbps). The drivers are available for Windows 98/ME/2000/XP.

The modem is very easy to use, as the connection to the internet is made using standard Windows Dial-up networking. A special program for sending SMS is included.

Teltonika ModemUSB/E6 is an advanced solution for a very reasonable price.
