Real-time business transaction, sending and receiving e-mails, browsing WEB database, accessing VPN and sending SMS messages from your PC etc - all in your hand! With the help of Teltonika ModemUSB/G10, you can maintain your top mobility, easy access to the Internet no matter you are in a train, bus, or in a car.

Teltonika ModemUSB/G10 has a built-in USB interface, just simply plug it into any notebook or desktop computer and you are able to get connected to the Internet via GSM network. Unlike PCMCIA modems, Teltonika ModemUSB/G10 can be connected not only to notebook, but to any PC having USB support. Teltonika ModemUSB/G10 connects to the PC through USB 2.0 (Universal Serial Bus) interface, which is very speedy and convenient. The modem takes the DC power directly from the USB interface, so no charging device or external AC/DC adapter is required. You will achieve much higher speeds with Teltonika ModemUSB/G10 than with ordinary dial-up modem.

MAIN FEATURES:

The data type and data transfer speed depends on the service provided by your GSM operator. ModemUSB/G10 supports the following data-bearers:

CSD/GPRS
